

My involvement began with the Morehouse College Atlanta Alumni Association as a general body member in 2017. I became more enthused and involved in 2022 as Parliamentarian.

I believe I am qualified for the position of Chapter President due to my steadfast involvement with the association. This insight has prepared me for additional responsibility and opportunity to make a greater impact.

As the association's President, I would aim for maximum impact on individual members, the student body and the community affected by the alumni association.

My goal is to focus on this individual impact by championing Black males via the advocacy of emotional health, physical fitness, mentorship within the Morehouse student body and the association's greater community. The three pillars which this impact is to be manifested are fellowship, fundraising and fun.

I will continue to apply my professional and life experience to the chapter's benefit. It is my sincere intent to build on the momentum this current administration has initiated over the last two years.
